Summary

Motivated and detail-oriented Individual committed to continuous learning and professional growth. Adept at programming languages such as Java, HTML, CSS and enthusiastic about learning and applying new technologies. Demonstrated problem solving skills through projects to gain a foundation in software development concepts. Enthusiastic about collaborating with experienced developers to expand my knowledge and contribute to innovative solutions.

Experience

- Intern

1 month

Indore, India

The Sparks Foundation

I worked as a Web Developer Intern at The Sparks Foundation. I made a basic banking system that transfers money to the beneficiaries and keeps the record of it. The project was made implementing technologies like HTML, CSS, Bootstrap and JavaScript.

 - Made the user interface of the webpage using HTML ,CSS and Bootstrap.
 - Added functionalities like money transfer and transaction record using JavaScript.
- Intern

12/2019 - 05/2020

Pithampur(M.P), India

CNH Industrial

CNH Industrial is a global capital goods company specializing in equipment and services like Backhoe Loader, Road Roller and more for Agriculture and Construction.

 - Department - Paint Shop.
 - Inspected the assembly area and provided solutions on the SOP's to provide an effective and un-interrupted movement of logistics.
 - Completed research, compiled data, and assisted in timely reporting.
 - Analyzed problems and worked with teams to develop solutions.
 - Explored new technologies and approaches to streamline processes.
 - Frequently inspected production area to verify proper equipment operation.
 - Maintained overall safe work environment with employee training programs and enforcement of safety procedures.

Projects

- **My-Portfolio**

My-Portfolio

This portfolio website, built with HTML, CSS, and JavaScript, showcases my personal and professional background. It includes sections for personal information, education, work experience, and projects. Each project is detailed with descriptions and links. The site is designed to be clean and responsive, ensuring a seamless user experience across devices. Additionally, a contact form is provided for easy communication.
- **Basic Banking System**

Basic Banking System.

The Projects depicts the working of a basic banking system. The project lets the user transfer money to any of the saved beneficiary and keeps the transactions record in a separate table. The frontend part of the project is made using HTML,CSS and Bootstrap, and the backend is made using JavaScript.
- **Museum-Webpage**

Museum-Webpage

This is the replica of a museum webpage made using html and css. The webpage contains a navigation bar, grid of images, action buttons. The Webpage is responsive to the screen size.
- **Airline Reservation System**

Airline Reservation System.

Built a project using java to provide ease in customer and user management in Airline services by using Netbeans and MYSQL Workbench that further uses JavaSwing and SQL. Provides a tool to Add User, Add flights and Book Tickets for the customers and maintain a record in the database.
